Tableau
TD2U FORENSIC DUPLICATOR

Exceptional Performance & Value: Built to excel in both field and lab environments, the Tableau TD2u Forensic Duplicator is the ideal combination of easy operation, reliability, and ultra-fast forensic imaging performance. From the outside, TD2u looks similar to its predecessor model, the award-winning TD2. From the inside out TD2u is all new. Built with the most advanced technology, TD2u delivers high performance forensic features at a budget friendly price.

Forensic Imaging Support for USB 3.0, SATA, IDE, and SAS: Forensic examiners rely on TD2u to image SuperSpeed USB 3.0, SATA, IDE, and SAS storage devices. Using the very latest in solid-state SATA drives, TD2u images in excess of 15 GB/minute (.eO1, compressed with MD5 and SHA-1 hashing). Wiping speeds exceed 25 GB/min. TD2u makes one (1:1), two (1:2), or three (1:3) copies of evidence drives. Standard features include Disk-to-Disk (clone), Disk-to-File (image), Format, Wipe, Hash (MD5 and SHA-1), HPA/DCO detection and removal, and Blank Disk Check. TD2u outputs to raw (dd), .e01 (compressed), .ex01 (compressed), and .dmg (MAC) formats. Extensive log files are maintained for viewing and saving. Visit our website (guidancesoftware.com/tableau) for TD2u product specs, videos and additional information.

Integrated Support for SuperSpeed USB 3.0 Devices: The convenience of USB 3.0 is built into TD2u. Write-blocked source and read/write destination USB 3.0 connections are easily accessible on the front of TD2u. No need for special adapters. Simply connect your thumb drive or USB 3.0 enclosure and start imaging.

Color LCD User Interface Enhances the User Experience: TD2u's color LCD user interface provides crisp, easy-to-view operational and device status information. The color display improves the user experience significantly. The TD2u's learning curve is minimal. We've maintained the same easy to navigate menu structure as our prior generation products. Easy-to-learn and operate, a Tableau hallmark for over ten years.

TD2u Kit Includes the New Tableau TP5 Universal Power Supply: The TD2u kit ships with the new compact and lightweight TP5 universal power supply. TP5 includes a set of three power adapters used to connect and power all Tableau write blockers and duplicators. Separate power supply models for each product line are a thing of the past. TP5 may also be purchased separately.

TD2u Kit Contents

Each TD2u kit includes:

- TD2u Forensic Duplicator
- TP5 power supply with mini-fit adapters
- TC2-8-R2 3M to molex-4 power cable
- TC3-8 SATA signal cable
- TC4-8-R2 Unified SATA/SAS power + signal cable (3x)
- TC5-8-R2 3M power to SATA power cable
- TC6-8 IDE 80-ribbon conductor signal cable
- TC8 USB-A to mini-USB-B cable
- Micro fiber screen wipe
- QuickStart Guide
